

Inside Products Capabilities

Core competencies:

- ⤴ Making networks understandable
 - ⤴ Software to turn network traces into English
 - ⤴ Fast analysis of network problems -- in hours, not days
 - ⤴ Designing and troubleshooting IPv6 networks
 - ⤴ Analysis of SSL, AT-TLS and IPSec security protocols
 - ⤴ Tools which identify potential problems before users become aware of them.
- ⤴ Teaching about networks and how they work
 - ⤴ Web-based introductory classes
 - ⤴ In-person advanced classes

Past performance:

- ⤴ Large city government: A problem with law enforcement communications was resolved in hours, after they had spent days trying to determine what was going on.
- ⤴ Large state government agency: they have had our mainframe network monitoring product in place for years. No excitements, just a critical tool for managing their network which works consistently for them.
- ⤴ Large insurance company: design for their IPv6 network.
- ⤴ Large financial company: numerous software tools for managing their network.

Differentiators:

- ⤴ We understand, in depth, how networks work.
- ⤴ We can explain clearly what is going on, where the problems are, and what should be done next to fix them.
- ⤴ If there are special needs (including new or unusual network protocols), we can quickly (in weeks, not months) create a tool to address them.

Corporate data:

- ⤴ Woman-owned small business
- ⤴ Economically-disadvantaged business
- ⤴ In business since 2002
